

2023 Agricultural Ammonium Nitrate and Calcium Ammonium Nitrate Code of Practice,
Version 1.1

Summary of Changes

Section / Protocol	Changes
2. AN and CAN Code Procedures	1. Added section 2.4 Compliance Audit and Certification Terms & Conditions.
B1.1a	1. Removed “If present, bin gates providing access to storage bins containing ammonium nitrate are locked and secured,”.
C	1. Added N/A option for sites where all sales and shipments are CAN blends containing less than 70% content.
C1.1	1. Replaced “letter” with “policy”: <i>“Compliance with this section will be indicated through the presence of a written policy and procedure signed by the facility manager or designate that contains steps to comply with the listed requirements in this section. The <u>policy</u> should be current and renewed every two years within the facility audit schedule. The auditor may spot check documentation to ensure the policies are being followed.”</i>
C6	1. Replaced reference to protocol C5 with C6: <i>“NOTE: The Fertilizer Canada Ammonium Nitrate and Calcium Ammonium Nitrate Safety and Security Information brochure is a compilation of the information required within Section C5 C6 and can be used by Distribution and/or Retail facilities to meet the requirements of this section. The brochure can be found on the Fertilizer Canada website at www.fertilizercanada.ca. Large quantity customers need only receive the information brochure while small quantity customers (less than 500kg) must receive the information and have a review of the information documented.”</i>
D1	1. Added new Site Registration Requirements protocol.
